PROFILE SUMMARY

Unity and XR Developer with nearly 6 years of experience building games, VR/MR/AR applications, and interactive installations for global brands and studios. Specialized in Unity and C#, with Python-based computer vision (OpenCV, MediaPipe, YOLO) and generative AI workflows (ComfyUI). Experienced in integrating sensors and hardware devices to create immersive, real-time experiences from prototype to on-site deployment.

TECHNICAL SKILLS

- **Game & XR Development:** Unity, C#, VR, MR, AR, Meta XR SDK, Photon PUN, PlayFab, ScriptableObjects, Addressables, Shaders, VFX
- **Languages:** C#, Python, JavaScript, Node.js
- **AI & Computer Vision:** ComfyUI, OpenCV, MediaPipe, YOLO
- **Sensors & Hardware:** Meta Quest, Xreal, Leap Motion, Hokuyo LiDAR, Arduino
- **Web & Interactive:** Unity WebGL, three.js, p5.js
- **Tools:** Git, GitLab, Doxygen
- **Other:** Procedural Generation, Real-time Rendering, Sensor Integration, Interactive Installations

PROFESSIONAL EXPERIENCE

Option1 Design Studio

Jul 2025 – Present

XR Developer

Dubai, UAE

- Develop immersive VR, MR, and AR experiences in Unity and C# for international brand clients.
- Integrate XR and sensing hardware (Meta Quest, Xreal, Leap Motion, Hokuyo LiDAR) and build sensor-driven interactions with proximity and touch triggers.
- Build camera-based, real-time interaction systems using OpenCV and MediaPipe.
- Implement networking and backend services with Meta XR SDK, Photon PUN, and PlayFab.
- Helped set up the studio's internal XR experience center (installation, testing, debugging) and maintain live Unity installations.

1Qubit Events Management

Mar 2023 – Present

Interactive Software Developer

Dubai, UAE

- Developed an interactive Unity installation for **Hugo Boss at Dubai Mall**, using people detection to generate dynamic real-time shadows from visitor movement.
- Integrated MediaPipe and YOLO models with Unity for real-time body and interaction tracking.
- Built hybrid installations combining Unity WebGL, three.js, p5.js, and Arduino, including Arduino-controlled motor systems for physical motion.
- Implemented video triggers, particle systems, animations, and touchscreen interactions.

GameEver Studio

Apr 2022 – Mar 2023

Unity Game Developer

Dubai, UAE

- Developed gameplay systems across multiple titles, including FPS and 2D games.
- Built enemy AI, core gameplay mechanics, UI, VFX, shaders, and animation systems.
- Reduced build size by **30 MB** through asset optimization.
- Architected scalable, data-driven gameplay systems using ScriptableObjects.

Spartans Global

Dec 2020 – Apr 2022

Unity Game Developer

Islamabad, Pakistan

- Developed and maintained mobile games in Unity, covering gameplay mechanics, physics, UI, and performance optimization.
- Implemented data-driven systems using ScriptableObjects, Addressables, and JSON-based data management.

EDUCATION

Bachelor of Computer Science | Islamabad, Pakistan

Feb 2017 – May 2021
