## Profile Summary

Unity Developer with **5+ years of experience** building games, XR applications, and interactive installations for global brands and studios. Specialized in **VR, MR, and AR** development using Unity and C#. Experienced in integrating **sensors, computer vision systems, and hardware devices** to create immersive real-time experiences.

## Technical Skills

- **Game & XR Development:** Unity, VR, MR, AR, Meta XR SDK, Photon PUN, PlayFab
- **Languages:** C#, Python, NodeJS
- **Computer Vision & Sensors:** OpenCV, MediaPipe, Leap Motion, Hokuyo LiDAR, Arduino
- **Web & Interactive:** WebGL
- **Tools:** Git, GitLab, Trello, Slack, Bitrix, Doxygen, Clickup
- **Other:** Procedural Generation, Real-time Rendering, Sensor Integration, Interactive Installations

## Professional Experience

### Option1 Design Studio — XR Developer

**Dubai, UAE**

**July 2025 - Present**

- Developing immersive VR, MR, and AR experiences for international brands using Unity.
- Integrating XR hardware including Meta Quest, Xreal glasses, Leap Motion, and Hokuyo LiDAR.
- Building real-time interaction systems using OpenCV and MediaPipe.
- Implementing networking and backend systems using Meta XR SDK, Photon PUN, and PlayFab.
- Developing sensor-driven interaction systems using proximity and touch triggers.
- Assisting in the setup of an internal XR experience center including installation, testing, and debugging.
- Maintaining interactive installations using Unity.

## **Qubit Events Management — Interactive Software Developer**

***Dubai, UAE***

***March 2023 - Present***

- Developed an interactive installation for **Hugo Boss** at Dubai Mall using Unity.
- Implemented people-detection systems generating dynamic real-time shadows based on user movement.
- Integrated **MediaPipe** and **YOLO** models with Unity for real-time interaction tracking.
- Combined **Unity WebGL**, **three.js**, **p5.js**, and Arduino for hybrid installations.
- Implemented video triggers, particle systems, animations, and touchscreen interactions.
- Designed Arduino-controlled motor systems for installation-based motion control.

## **GameEver Studio — Unity Game Developer**

***Dubai, UAE***

***April 2022 - March 2023***

- Developed gameplay systems for multiple projects including FPS and 2D games.
- Built enemy AI systems, gameplay mechanics, and UI systems.
- Implemented VFX, shaders, and animation systems.
- Reduced build size by 30MB through asset optimization.
- Developed scalable gameplay systems using Scriptable Objects.

## **Spartans Global — Unity Game Developer**

***Islamabad, Pakistan***

***Dec 2020 - April 2022***

- Developed and maintained mobile games using Unity.
- Implemented systems using Scriptable Objects, Addressables, and JSON-based data management.
- Worked on physics systems, gameplay mechanics, UI systems, and optimization.
- Collaborated with art and design teams to deliver polished game features.

## **Education**

**Bachelor of Computer Science**

**Islamabad, Pakistan**

CGPA 3.05 / 4.0

**Feb. 2017 - May 2021**
